Who Are Vaporo Solutions?

At Vaporo Solutions, we offer stylish heating solutions that will enhance the look of your new or existing home. We have designed and created a bespoke range of designer radiators, available in a variety of design specs, colours, shapes and sizes, guaranteed to add unrivalled style, luxury and comfort to any room in your home, whether it's a new build or a renovation.

Modern designer radiators are no longer considered luxury items. We match function and affordability with style and high performance.

Our radiators offer high heat outputs with attractive contemporary design, adding functionality and style to your home. A designer radiator can help you make the most of the space available and turn your heating into an attractive focal point of the room. Designer radiators have transformed the home heating market.

At Vaporo we have a wide range of contemporary vertical and horizontal designs that can make the most of your available floor and wall space. Our radiators can heat any home whilst adding a modern flair to your decor.

Our collection features an array of finishes and colours – including high gloss white, chrome, black and anthracite, so you can heat your home in style. All Vaporo design radiators can be easily plumbed in to your home heating system and make an ideal decorative replacement for existing radiators. All Vaporo designer radiators are compliant with various renewable energy sources.

Each radiator has been tested and certified to **BS EN442** standards so you can be reassured of high quality radiators with a **5-year warranty**.

Our range of **designer radiators** feature:

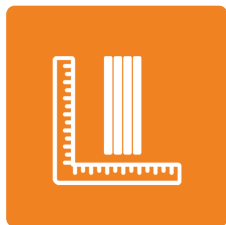

5 year
warranty

1.5mm steel
construction

Aluminium
options
available

Wide variety
of style, sizes &
finishes

High heat
outputs at
Delta T50 & T60

All models are
compliant with
renewable
heating

We can advise you on how to integrate your new designer radiators into your existing heating system.

Discover our stunning collection of designer radiators and begin to heat your home stylishly and efficiently with the help of Vaporo Solutions.

Custom Coated Colour Options

Elevate your home with radiators tailored to your unique style. Our Custom Coated Finishes offer the opportunity to personalise your steel radiator with a range of powder coat finishes in RAL colours, creating the perfect fit for any interior scheme. Whether you're seeking subtle neutral tones or bold statement hues, our extensive colour options allow you to seamlessly blend your radiator into your space or make it a standout feature.

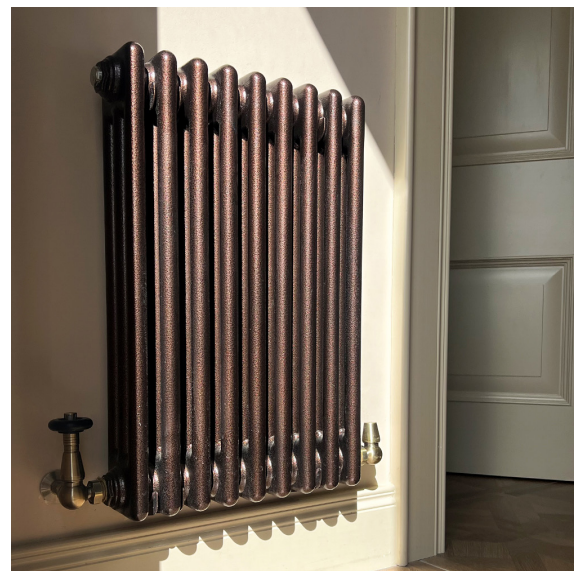

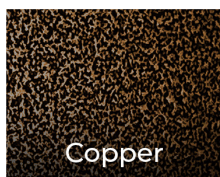

Powder coating not only provides a durable, long-lasting finish but also enhances the radiator's resistance to scratches, chips, and corrosion – ensuring your radiator remains looking its best for years to come. Each custom-coated radiator is meticulously finished to the highest standards, delivering both aesthetic appeal and performance.

Choosing a custom colour is the ideal way to match your radiator to surrounding décor or add a striking design element to your room. Our team is on hand to guide you through the colour selection process, ensuring your radiator is finished to your exact specifications.

Key Benefits of Custom Coated Finishes:

- Available in a wide range of RAL colours.
- Durable powder coat finish for long-lasting protection.
- Enhanced scratch and corrosion resistance.
- Perfect for personalised interior design schemes.
- Expert guidance on colour selection.

Designer Radiators

An Intro to Steel Radiators

Steel Radiators: Durable, Efficient & Stylish Heating Solutions

Steel radiators offer the perfect balance of durability, efficiency, and modern design. Known for their robust build and excellent heat conduction, these radiators are a reliable choice for any home or commercial space. With a wide range of styles, sizes, and finishes available, steel radiators not only heat your space effectively but also enhance its aesthetic appeal.

Excellent
Heat Retention

1.5mm Durable
Steel
Construction

Energy
Efficient

Versatile
Options

One of the key advantages of steel radiators is their excellent heat conductivity. Steel retains heat well, ensuring your home stays warm for longer, even after your heating system is turned off. This makes them an energy-efficient option for homeowners who want to maximize heat output while minimizing energy consumption. Additionally, steel radiators heat up quickly, providing rapid warmth to your living space when you need it most.

Available in a wide range of styles, sizes, and finishes, steel radiators can suit any room in the house. Vertical designs are perfect for maximizing wall space in smaller areas, while horizontal options offer a classic look under windows or along walls. With a variety of colours available – from crisp white to bold brushed bronze – steel radiators can enhance the overall look and feel of your space.

Built for longevity, steel radiators are designed to withstand daily wear and tear, making them a long-term investment for your home. Their robust construction ensures resistance to corrosion and damage, while the high-quality finish maintains a sleek appearance over time.

Affinity Specification

IMPORTANT: The distance between the connection centres equals the length of the radiator

Affinity Vertical - Single Panel

Radiator Height (mm)	1800
Water Content Per Tube (L)	1.008

Affinity Horizontal - Single Panel

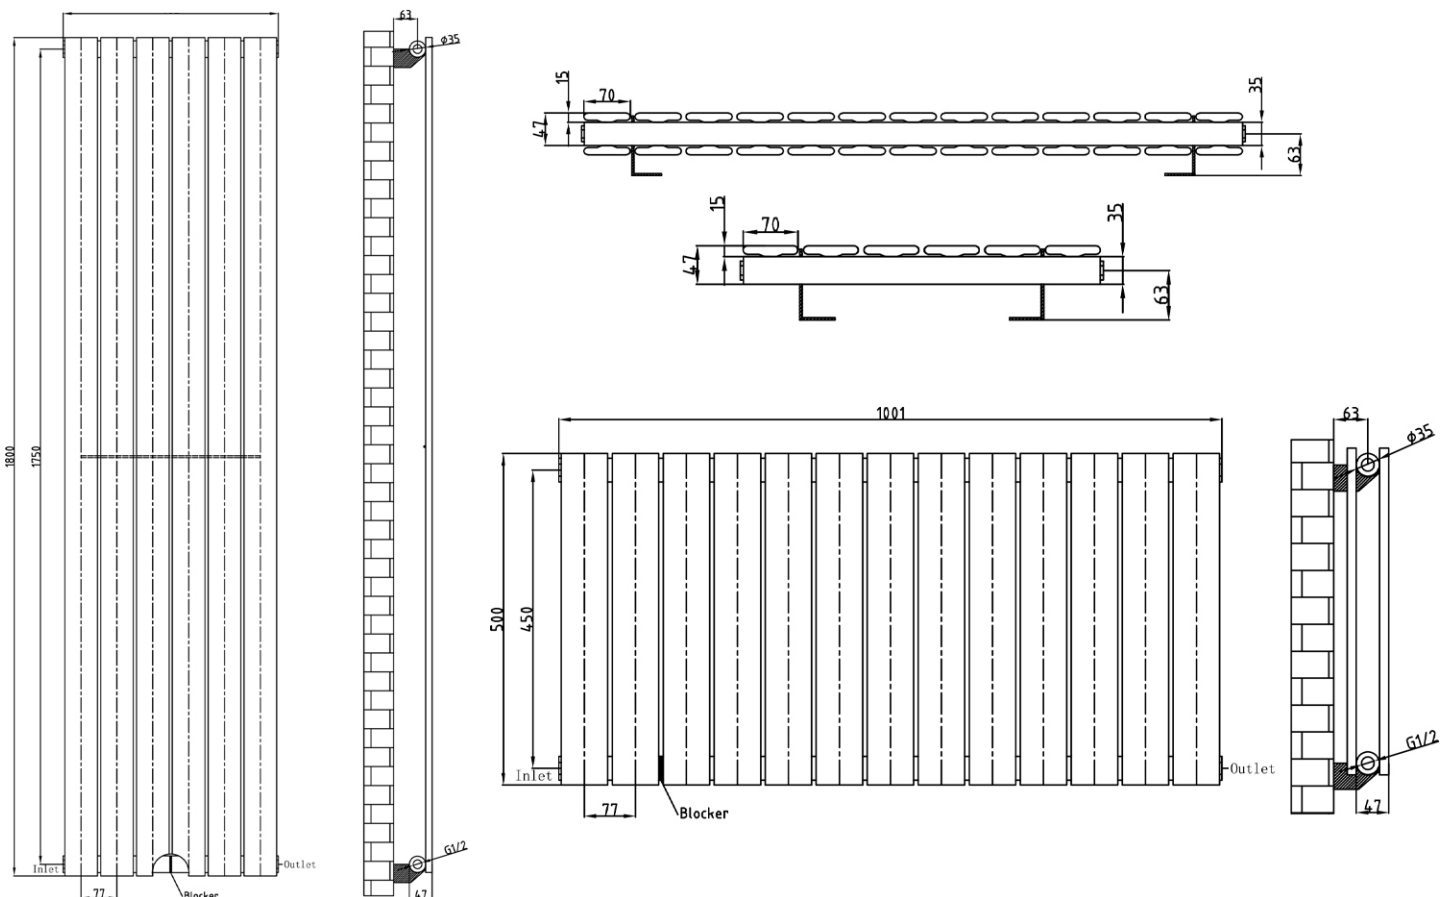

Radiator Height (mm)	400 600
Water Content Per Tube (L)	0.224 0.336

Affinity Vertical - Double Panel

Radiator Height (mm)	1800
Water Content Per Tube (L)	2.016

Affinity Horizontal - Double Panel

Radiator Height (mm)	400 600
Water Content Per Tube (L)	0.560 0.672

All Vaporo radiators are BOE and pipe centres are the radiator width plus 74mm.

If used with Vaporo Valves.

Please note due to manufacturing tolerances pipe centres may vary by +/- 10mm, we recommend that pipe work is not altered until your radiator is on site.

All Affinity Radiators: **Test Pressure:** 7 bar

Max Operating Pressure: 6 Bar

Nika

Steel Radiators

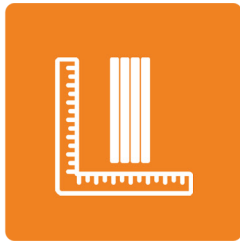

The **Nika** radiator's oval tube design adds a beautiful, contemporary feature to your home. These sleek radiators impress not only with their clear, structured and modern design, but also with their outstanding performance. Thanks to their slim design, Nika radiators can be installed in small rooms and niches.

The radiators are manufactured to the highest possible standard using premium quality mild steel which ensures reliability and provides an impressive heat output. These radiators have a fantastic finish and the high quality components used inside provide an excellent heat output in comparison with cheaper alternatives.

Entire range features double panel options

Horizontal & Vertical options with a range of sizes

5 year warranty on all Nika Radiators

Manufactured and tested to BS EN 442

Available in a range of RAL colours

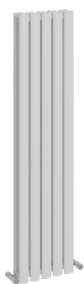

All Nika Radiators are available in white & anthracite from stock.

Full Range Of Nika Radiators

Nika Specification

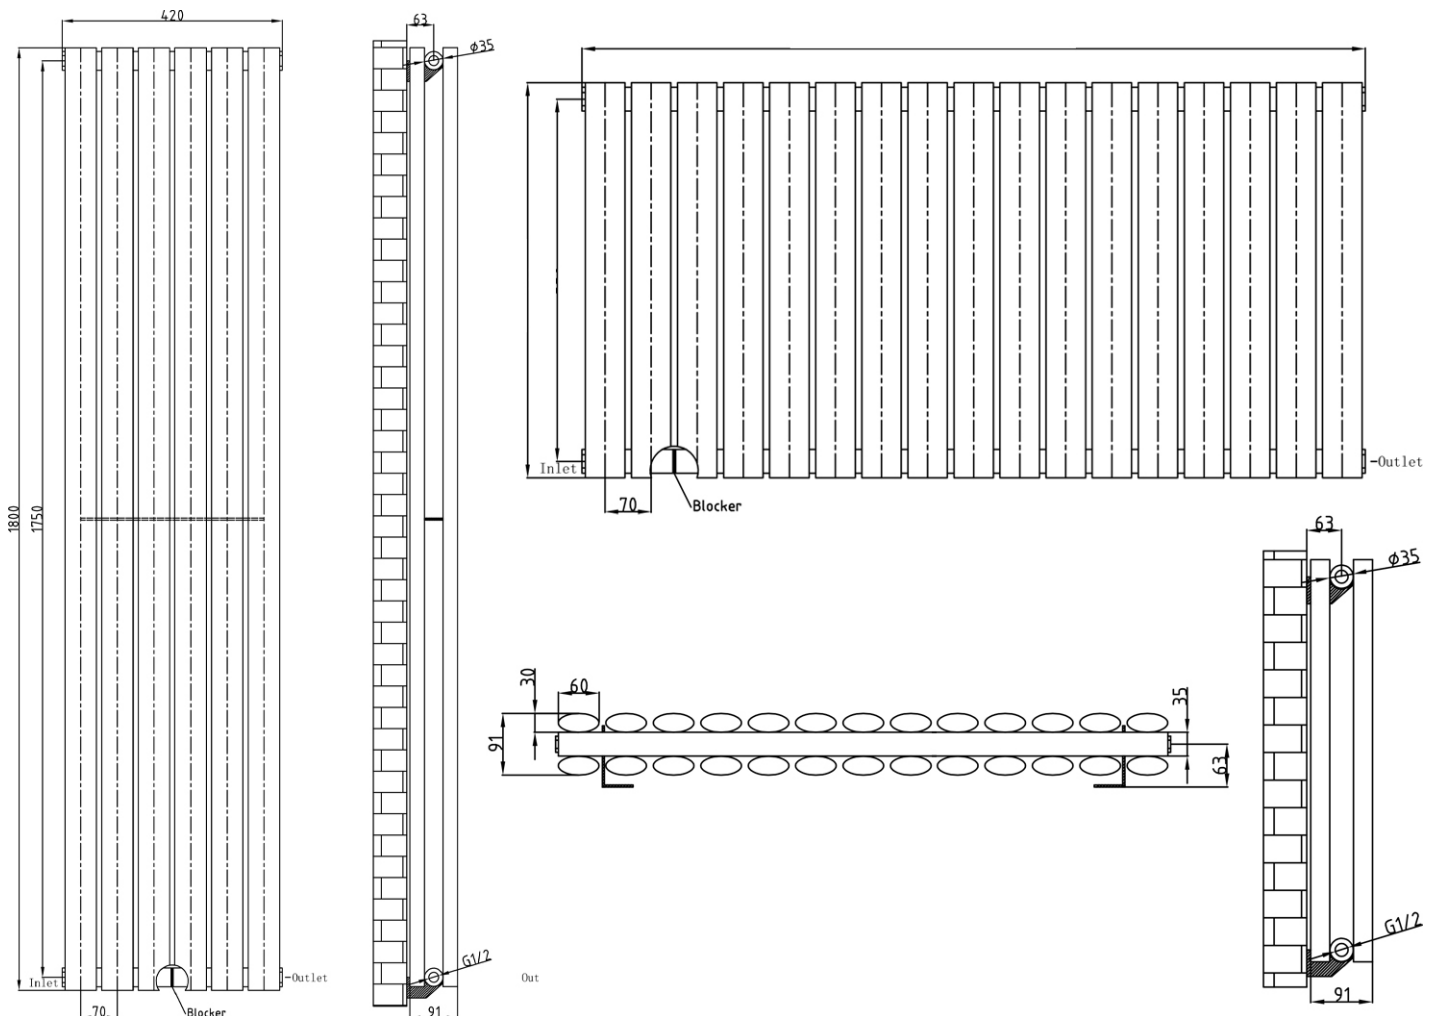

IMPORTANT: The distance between the connection centres equals the length of the radiator

Nika Vertical - Double Panel

Radiator Height (mm)	1800
Water Content Per Tube (L)	4.197

Nika Horizontal - Double Panel

Radiator Height (mm)	600
Water Content Per Tube (L)	1.399

All Vaporo radiators are BOE and pipe centres are the radiator width plus 74mm.

If used with Vaporo Valves.

Please note due to manufacturing tolerances pipe centres may vary by +/- 10mm, we recommend that pipe work is not altered until your radiator is on site.

All Nika Radiators: **Test Pressure:** 12 bar

Max Operating Pressure: 10 Bar

Tradicio

Steel Radiators

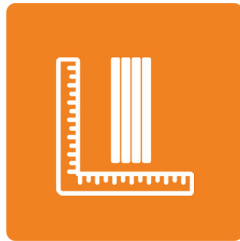

Tradicio is an expertly crafted multi-column designer radiator that blends timeless design with modern efficiency. Inspired by traditional cast iron styles but built with today's interiors in mind, Tradicio brings warmth and elegance to both classic and contemporary spaces.

Its refined silhouette and compact structure make it a versatile choice for various room settings, adding a subtle yet sophisticated charm to your home. Whether featured in a period hallway, a modern living room, or a transitional kitchen, Tradicio effortlessly enhances the character of your space.

Entire range features a three column design

Horizontal & Vertical options with a range of sizes

5 year warranty on all Tradicio Radiators

Manufactured and tested to BS EN 442

Available in a range of RAL colours

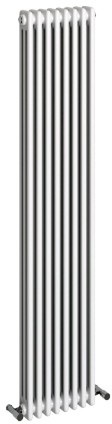

All Tradicio Radiators are available in white, anthracite & black from stock.

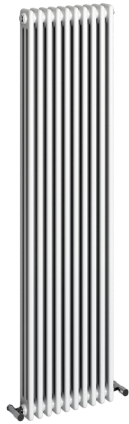

Full Range Of Tradicio Radiators

Designer Radiators

An Intro to Aluminium Radiators

Aluminium Radiators – Lightweight, Modern & High-Performance Heating

Discover the perfect combination of efficiency, style, and sustainability with our range of aluminium radiators. Designed to provide rapid heat-up times and excellent energy efficiency, aluminium radiators are an ideal choice for modern homes looking to reduce energy costs while maintaining superior warmth and comfort

Fast Heat Up
Times

Lightweight
Construction

Lower Your
Carbon
Footprint

Modern
Designs

One of the standout features of aluminium radiators is their lightweight construction, making them easier to handle and install compared to traditional steel alternatives. Despite their lighter weight, these radiators are incredibly durable and resistant to corrosion, ensuring long-lasting performance and reliability.

Aluminium is a highly conductive material, meaning it heats up quickly and distributes warmth efficiently, making your home comfortable in less time and using less energy. This makes them a great option for low-temperature heating systems, including renewable energy sources such as heat pumps, helping to lower carbon footprints without compromising on performance.

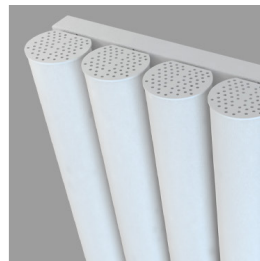

With a sleek, modern design and a variety of sizes and finishes available, our aluminium radiators not only perform exceptionally well but also enhance the aesthetic appeal of any space. Whether you're looking for a contemporary statement piece or a subtle, stylish heating solution, there's an aluminium radiator to suit your needs.

Aluminium Radiators

A stunning addition to our collection; the **Valerio** Radiator offers a sleek design and contemporary finish combined with high performance. These radiators have a stunning and futuristic appearance as well as being non-corrosive, light weight and very easy to install. Made from aluminium, a faster heat up time is achieved as aluminium is a superb conductor of heat. In addition, a much lower water content is needed, meaning running costs are kept low, resulting in great value for money. With this high output, Valerio radiators tend to be about 40% smaller than conventional radiators. With a choice of two colours, these radiators can achieve pride of place in any home. Valerio radiators are also well suited to renewable energy systems.

Faster heat up times compared to steel

Horizontal & Vertical options with a range of sizes

5 year warranty on all Valerio Radiators

Manufactured and tested to BS EN 442

Energy efficient construct & design

Multiple Colour
Options

A heated towel rail is more than just a functional heating solution, it's an essential addition to any modern bathroom. Beyond keeping your towels warm and toasty, these radiators play a vital role in reducing moisture and dampness, ensuring your bathroom remains fresh, hygienic, and comfortable. Designed with energy efficiency in mind, our heated towel rails provide excellent heat output while consuming minimal energy, making them an eco-friendly, cost-effective, and stylish choice for your home.

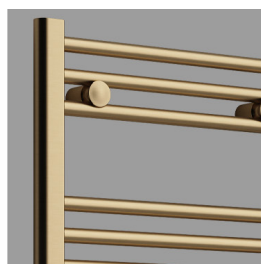

With a variety of finishes available, including brushed brass, chrome, anthracite, and matt black, our collection allows you to customise your space to reflect your personal style and décor preferences. Whether mounted in a bathroom, ensuite, or utility room, our heated towel rails seamlessly combine elegance and function. They not only enhance your space but also provide year-round comfort, making them a must-have addition for any home looking to improve both aesthetics and practicality.

Sierra
Heated Towel Rail

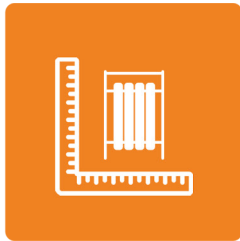

Add a timeless touch of elegance to your bathroom with the **Sierra** traditional heated towel rail range. Designed to blend classic style with modern functionality, the Sierra collection is the perfect choice for those seeking both practicality and a nod to traditional design.

With its beautifully crafted form and vintage-inspired details, the Sierra towel rail brings character and charm to any bathroom, ensuite, or cloakroom. The straight towel bar design offers a space-saving solution by staying flush to the radiator, rather than protruding outward. Available in three stunning finishes, chrome, black, or brushed brass, the Sierra range allows you to tailor your towel rail to complement your interior design.

A modern, black, minimalist heated towel rail is mounted on a wall. The wall is covered in large, square tiles with a textured, greyish-blue finish. The towel rail consists of several horizontal bars of varying lengths, creating a stepped, sculptural appearance. At the top, two small, cylindrical valves are visible. The lighting is soft, casting gentle shadows and highlighting the textures of the tiles and the rail.

Aversa

Heated Towel Rail

Aversa introduces a premium collection of stainless steel designer radiators, setting new standards in style, performance, and craftsmanship. Made to perfection the highly corrosion resistant body is completed in a chrome finish for an aesthetically pleasing appearance. The designer look of this radiator is sure to bring a touch of luxury to your entire bathroom.

Enjoy the convenient dual use of a radiator whilst ensuring your towels are kept conveniently warm as this premium range offers considerable performance with optimum heat output.

Aura Specification

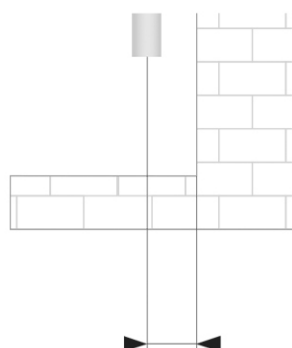

IMPORTANT: The distance between the connection centres equals the length of the radiator

Aura 22mm Straight

Radiator Height (mm)	800 - 1785
Water Content Per Tube (L)	3.3 - 8.5

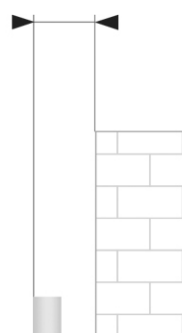

Connection

straight	
Min.	Max
85	95

Wall distance

straight	
Min.	Max
70	80

All Vaporo radiators are BOE and pipe centres are the radiator width plus 74mm.

If used with Vaporo Valves.

Please note due to manufacturing tolerances pipe centres may vary by +/- 10mm, we recommend that pipe work is not altered until your radiator is on site.

All Aura Heated Towel Rails: **Test Pressure:** 6.5 Bar

Max Operating Pressure: 5 Bar

Alta

Heated Towel Rail

Add a touch of style to your bathroom whilst keeping it warm with Vaporo's range of heated towel rails that offer something for every taste and budget. The Alta range of towel radiators offers all kinds of options to heat your bathroom whilst warming your towels at the same time. They come in a variety of sizes and styles including 4 modern colours featuring durable powder coated paint.

All our towel radiators are designed to be energy efficient and use the least amount of space to provide the most heat possible.

4 colour options. Chrome, anthracite, matt black & white

Wide range of sizes. Multiple heights and widths

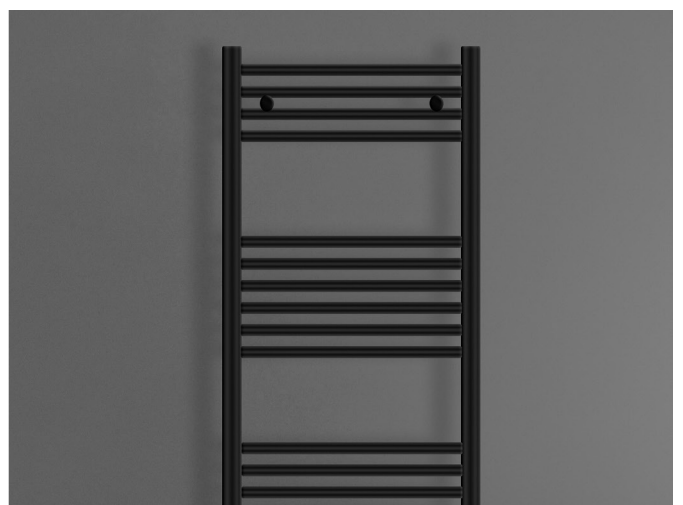

5 year warranty on all Alta heated towel rails

Manufactured and tested to BS EN 442

Energy efficient construct & design

All Alta Towel Rails are available in chrome, anthracite, matt black & white.

Full Range Of Alta Heated Towel Rails

All Alta Towel Rails are available in chrome, anthracite, matt black & white.

Elements

Optional & Prefilled

Enhance the functionality of your radiators & heated towel rails with a thermostatic element, the perfect solution for precise temperature control and added flexibility. Whether you're upgrading an existing radiator or selecting a complete electric unit, our thermostatic elements allow you to enjoy warm towels and additional bathroom heating all year round, independent of your central heating system.

At Vaporo Solutions, we offer two thermostatic element options to suit different needs and installation preferences.

Optional Thermostatic Elements

Accessories

Valves, Pipe Sets & Towel Hangers

Valves

Complete your radiator setup with our carefully curated range of high-quality valves, designed to complement both modern and traditional interiors. Whether you're looking for a sleek, contemporary finish or something with classic character, our selection offers the perfect solution. Choose from round valves for a clean and minimal look, thermostatic radiator valves (TRVs) for greater control and energy efficiency, or traditional valves that pair beautifully with column and heritage-style radiators. Each valve in our collection is built with durability, performance, and style in mind, providing the ideal finishing touch to your heating installation.

i. Thermostatic Radiator Valves (TRVs) allow you to control the temperature of individual radiators with precision, helping to improve energy efficiency and comfort in your home. By automatically adjusting the flow of hot water based on the room's temperature, TRVs help maintain your desired heat level while reducing energy waste.

Helpful Info BTU & Delta T

What Size Of Radiator Do I Need?

To ensure your home stays warm and comfortable, it's important to choose a radiator with a heat output that closely matches your room's needs. We recommend selecting a radiator within 10% of your calculated BTU (British Thermal Unit) requirement. If you're unsure, it's better to opt for a slightly larger radiator. An oversized radiator can always be turned down using valves, but a radiator that's too small won't provide sufficient warmth.

How Do I Choose The Right Radiator?

Radiator output is measured in BTUs, which take into account room size, ceiling height, window area, insulation, and other key factors. This measurement helps determine the level of heat needed to warm your room effectively. To find the right radiator for your space, use our BTU Calculator. By entering a few details about your room, you'll receive a tailored BTU requirement to help you choose a radiator that delivers the perfect balance of warmth and comfort.

How Do I Calculate The BTUs For My Room?

For the most accurate calculation, we recommend speaking to a qualified plumber or heating engineer. However, our BTU Calculator offers a quick guide. Just remember: the BTU result represents the total output needed for the room, so you may need more than one radiator or towel rail in larger spaces.

Delta T Conversion

What is Delta T?

Delta T, or ΔT , refers to the difference between the temperature of the water flowing through your central heating system and the ambient room temperature. For example, if the room temperature is 20°C and the average temperature of the water inside the radiator is 70°C, then the Delta T value is 50°C (70°C - 20°C = 50°C).

In the UK, Delta T 50°C is the standard measurement used for domestic gas boilers. This benchmark ensures consistency when comparing heat outputs of radiators and towel rails across different manufacturers and product ranges. It allows heating professionals, homeowners, and consumers to make informed and accurate comparisons when selecting heating solutions.

Delta T Correction Factors (Delta T50°)

A Delta T correction factor helps both end-users and heating professionals determine the actual heat output of a radiator or towel rail when operating at different Delta T values. The calculator above is specifically designed to provide accurate output figures based on an input at Delta T 50°. Alternatively, you can refer to the correction factors listed below, which are also based on the standard Delta T 50° benchmark.

Example: If a radiator or towel rail has a heat output of 1000 BTUs at ΔT (Delta T) = 50°, its output at a lower ΔT will decrease accordingly. For instance, at ΔT = 30°, the output would be 1000 x 0.51 (based on the correction factor), resulting in 510 BTUs. At ΔT = 40°, using a correction factor of 0.75, the output would be 1000 x 0.75, giving 750 BTUs.

Delta T	Correction Factors
75°	1.69
70°	1.54
65°	1.41
60°	1.28
55°	1.154
50°	1
45°	0.895
40°	0.767
35°	0.657
30°	0.543
25°	0.433
20°	0.328
15°	0.229
10°	0.12
5°	0.05

T&C's & Warranties

5 year warranty on
Radiators &
Heated Towel
Rails

1 year warranty on
Electric Elements

1 year warranty on
Accessories

All radiators and heated towel rails in our collection come with a comprehensive 5-Year Warranty, provided the product is registered with us upon purchase. This includes 2 years parts and labour cover, followed by an additional 3 years parts-only cover, giving you peace of mind and assurance in the quality of your investment.

For commercial or public installations, a 1-year warranty applies to all radiators and heated towel rails, covering both parts and labour.

Please note that electric elements included with our products carry a 1-year warranty only, regardless of installation type.

Our accessory range, including valves, towel hangers, radiator feet, and pipe sets, is covered by a 1-year warranty from the date of purchase.

To activate your warranty and ensure full coverage, product registration is required. For further information or to register your product, please contact our customer service team or visit our website.

Terms & Conditions

For a complete list of terms and conditions, please contact us directly. All measurements are provided in millimetres and, along with images and technical drawings, are intended for guidance purposes only. Please note that colours may vary slightly from those shown due to printing and screen differences. We reserve the right to update or modify product specifications without prior notice.

Due to standard manufacturing tolerances, pipe centres on radiators and towel rails may vary by ± 10 mm. As such, we strongly recommend that no pipework is installed or altered until the radiator or towel rail is delivered and on-site.

Compatibility

While the majority of Vaporo Designer Radiators and accessories are compatible across our range, it is essential to carefully review product specifications before ordering to avoid any installation issues. Technical drawings and additional guidance are available on request.

Errors & Omissions

In our commitment to continual product improvement, Vaporo reserves the right to modify colours, designs, and specifications at any time without prior notice.
